

## Assignment 6a — HighFi Prototype

### DESIGN RATIONALE

I replicated my low-fi prototype into Figma. Even though I made the “Delete Item” link smaller than the actual text of the items, it still is able to catch the attention of the user just in case they want to delete any items out of their cart. The cart sub-total is right above the checkout button in order to remind the user of the price right before they commit to an order.
